

The process of the development

Linear units to measure your demands and according to your wishes.

Almotion® located in The Netherlands is a respected manufacturer of linear units. Since 1996 the brand LINEAIRTECHNIEK® exists these linear units are designed and made by Almotion, at their own production department. Almotion® is able to adapt various drive applications of the standard units to your application and wishes. An entirely new unit can be developed as well. The long time experience and high level engineering department can combine your requirements and develop them into the best drive solution. The next pages show examples of customer cases and their Linear Solutions.

The process of the development of a “Solution Unit” is displayed in the following chart;
