

Stainless steel cylinders

FESTO

- Corrosion-resistant in harsh ambient conditions
- Easy-to-clean design
- Wide choice of variants
- Comprehensive range of accessories

Stainless steel cylinders

Key features

Their applications

Reliable components need to achieve 100% operational reliability, even in harsh operating conditions. The aim is to maximise availability of machinery while minimising downtimes. Stainless steel cylinders are therefore used in applications where the surface finish of normal pneumatic drives would render them non-resistant to the surrounding media. However, designing a corrosion-resistant system involves more than simply selecting a suitable steel – it also requires the selection of a tailored concept for mounting components and accessories.

Their strengths

Festo's stainless steel cylinders are made from highly resistant materials such as 1.4301 and 1.4401. These popular high-alloy, stainless austenitic chrome/nickel and chrome/nickel/molybdenum steels protect against chemical or electrochemical stress as well as damage to the material surface caused by cleaning or detergents. These groups of materials are particularly resistant to uniform surface corrosion and offer increased protection against pitting and crevice corrosion.

Their advantages

Festo's worldwide service network ensures optimum availability of stainless steel cylinders. As well as a comprehensive range of standard cylinders to DIN ISO 6431 and 6432, we also offer a range of tailored mounting components and accessories. The stainless steel cylinders are assembled with USDA-H1 lubricating grease and wiper seals in accordance with BGV (Federal Institute for Risk Assessment) guidelines. This means that they are suitable for use in the food industry and for direct contact with food products. We will be pleased to answer any inquiries you may have about future additions to our stainless steel range. Just give us a call.

Good to know

Our many years of experience in the area of stainless steel can be invaluable when you are investigating solutions for harsh environments. Our experts can answer any questions you might have about surface finishes and chemical resistance.

The atmosphere in the curing cellar of a cheese factory consists of an unpleasant mix of ammonia, lactic acid and 98% humidity.

An area subject to radiation of up to 4 sievert/h whilst immersed in fully desalinated water in a manipulator for dismantling nuclear reactor pressure reservoirs and thermal shields.

Stainless steel cylinders

Key features

Resistance

Complete resistance to pitting and crevice corrosion is not always possible, even with ideal application parameters. The following parameters increase the pitting effect of chloride ions:

- Concentration of chloride ions
- Duration of contact
- Temperature
- Decreasing pH value

It must therefore be ensured during design, assembly and operation that all parts of the machinery can be properly cleaned to avoid an accumulation of chloride ions.

Selected sealing materials ensure very high resistance to a wide range of chemical compounds.

Further information on resistance to media can be obtained on the Internet at www.festo.com.

In principle, we recommend that the cylinder be cleaned with the piston rod in the retracted position to avoid the risk of washing out the lifetime lubrication.

Various types of machinery contamination make cleaning processes necessary in many industrial sectors. The degree of cleaning required ranges from wiping the machinery to wet cleaning to foam cleaning with different exposure times and concentrations.

It is therefore impossible to make a general recommendation on compatibility.

Wet cleaning

Foam cleaning

Operating conditions	
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)
Operating pressure ¹⁾ [bar]	1 ... 10
Suitability for use in the food industry ²⁾	As per manufacturer's declaration

- 1) An increase in the minimum operating pressure is possible with variants
- 2) Additional information www.festo.com/sp → User documentation.

Ambient conditions				
Standard cylinder	Basic version	A1	S6	TT
Ambient temperature ¹⁾ [°C]	-20 ... +80	0 ... +80	0 ... +120	-40 ... +80
Corrosion resistance class CRC ²⁾	3			

- 1) Note operating range of proximity sensors
- 2) CRC3: Corrosion resistance class to Festo standard 940 070
Components with heavy corrosion exposure. Externally visible components in direct contact with normal industrial atmosphere or media such as solvents and cleaning agents, where the surface requirement is predominantly functional.

ATEX ¹⁾	
ATEX category for gas	II 2G
Explosion ignition protection type for gas	c T4
ATEX category for dust	II 2D
Explosion ignition protection type for dust	c 120°C
Explosion-proof ambient temperature	-20°C ≤ Ta ≤ +60°C
CE marking (see declaration of conformity)	To EU Explosion Protection Directive (ATEX)

- 1) Note the ATEX certification of the accessories.

Modular product system

Individually configurable

CRDSNU → 25

- A1 – Wiper seal variant: For increased chemical resistance
- A2 – Wiper seal variant: Hard wiper seal
- A3 – Wiper seal variant: For unlubricated operation
- S2 – Through piston rod
- K2 – Extended male piston rod thread
- K3 – Female piston rod thread
- K5 – Special piston rod thread
- K8 – Extended piston rod at front
- S6 – Heat-resistant seals up to max. 120 °C (temperature resistance)
- TT – Low temperature -40 °C ... +80 °C
- ATEX certification II 2GD

Round cylinders CRDSNU, stainless steel

Technical data

Function

- - Diameter
32 ... 63 mm
- - Stroke length
1 ... 500 mm

General technical data

Piston rod thread		M10x1.25	M12x1.25	M16x1.5	M16x1.5
Design		Piston			
		Piston rod			
		Cylinder barrel			
Cushioning	P	Flexible cushioning rings/pads at both ends			
	PPV	Pneumatic cushioning, adjustable at both ends			
	PPS	Pneumatic cushioning, self-adjusting at both ends			
Cushioning length	PPV [mm]	14	18	20	21
	PPS [mm]	14	18	20	21
Position sensing		Via proximity sensor			
Type of mounting		Via accessories			
		With male thread			
Mounting position		Any			

Operating conditions	
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)
Operating pressure ¹⁾ [bar]	1 ... 10
Suitability for use in the food industry ²⁾	As per manufacturer's declaration

- 1) An increase in the minimum operating pressure is possible with variants
- 2) Additional information www.festo.com/sp → User documentation.

Ambient conditions					
Standard cylinder		Basic version	A1	S6	TT
Ambient temperature ¹⁾ [°C]		-20 ... +80	0 ... +80	0 ... +120	-40 ... +80
Corrosion resistance class CRC ²⁾		3			

- 1) Note operating range of proximity sensors
- 2) CRC3: Corrosion resistance class to Festo standard 940 070
Components with heavy corrosion exposure. Externally visible components in direct contact with normal industrial atmosphere or media such as solvents and cleaning agents, where the surface requirement is predominantly functional.

ATEX ¹⁾	
ATEX category for gas	II 2G
Explosion ignition protection type for gas	c T4
ATEX category for dust	II 2D
Explosion ignition protection type for dust	c 120°C
Explosion-proof ambient temperature	-20°C ≤ Ta ≤ +60°C
CE marking (see declaration of conformity)	To EU Explosion Protection Directive (ATEX)

- 1) Note the ATEX certification of the accessories.

Round cylinders CRDSNU, stainless steel

Technical data

Force [N] and impact energy [J]				
Piston Ø	32	40	50	63
Theoretical force at 6 bar, advancing	483	754	1,178	1,870
Theoretical force at 6 bar, retracting	415	633	990	1,682
Impact energy in the end positions for P cushioning ¹⁾	0.4	0.7	1.0	1.3

1) The values are reduced by approx. 50% at an ambient temperature of 80 °C

Average piston speed v as a function of applied load m in combination with PPS cushionings

- - Note
Average piston speed
= stroke/movement time

- - Note

Standard cylinders CRDNG to ISO 15552, stainless steel

Type codes

		CRDNG	-	50	-	80	-	PPV	-	A	-	S2
Type												
Double-acting												
CRDNG	Standard cylinder											
CRDNGS	Standard cylinder with swivel flange											
Piston Ø [mm]												
Stroke [mm]												
Cushioning												
PPV	Pneumatic cushioning, adjustable at both ends											
Position sensing												
A	Via proximity sensor											
Variant												
S2	Through piston rod											
S6	Heat-resistant up to 120 °C											

Standard cylinders CRDNG to ISO 15552, stainless steel

Technical data

Function

- Diameter
32 ... 125 mm
- Stroke length
10 ... 2,000 mm

www.festo.com

Wearing parts kits
→ 41

Variants

S2

S6

The variant S6 is not suitable for direct contact with food products because of the seals and the grease used.

CRDNG

CRDNGS

Conforms to

- ISO 15552
- ISO 6431
- VDMA 24562
- NFE 49003.1
- UNI 10290

DIN

General technical data							
Piston Ø	32	40	50	63	80	100	125

	Via female thread						
Mounting position	Any						

Operating and environmental conditions	
Variant	CRDNG/CRDNGS S6
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)
Operating pressure	0.6 ... 10 bar
Ambient temperature ¹⁾ [°C]	-20 ... +80 0 ... +120
Corrosion resistance class CRC ²⁾	4

1) Note operating range of proximity sensors

2) CRC4: Corrosion resistance class to Festo standard 940 070

Components with very heavy corrosion exposure. Components in contact with aggressive media, e.g. in food or chemical industries. These applications must, if necessary, be verified by special tests with the media concerned.

Force [N]							
Piston Ø	32	40	50	63	80	100	125
Theoretical force at 6 bar, advancing	482	753	1,178	1,870	3,015	4,712	7,360
Theoretical force at 6 bar, retracting	415	633	990	1,682	2,720	4,418	6,880

Standard cylinders CRDNG to ISO 15552, stainless steel

Technical data

Weight [g]							
Piston Ø	32	40	50	63	80	100	125
CRDNG							
Basic weight with 0 mm stroke	1,045	1,360	2,160	3,455	5,935	8,070	
Additional weight per 10 mm stroke	20	30	60	60	100	110	
CRDNGS							
Basic weight with 0 mm stroke	1,070	1,460	2,330				
Additional weight per 10 mm stroke	20	30	60				

Materials

1) CRC4: Corrosion resistance class to Festo standard 940 070
Components with very heavy corrosion exposure. Components in contact with aggressive media, e.g. in food or chemical industries. These applications must, if necessary, be verified by special tests with the media concerned.

Clevis foot CRLNG

Material:
High-alloy steel
Free of copper, PTFE and silicone
