One-way flow control valves

Key features

Function

Flow control or one-way flow control valves regulate the piston speed of pneumatic drives during advance and return strokes. This is done through suitable restriction of the flow rate of compressed air in exhaust air or supply air direction. With the one-way flow control valve GRLA or GRLZ, the flow control function works in one direction only (exhaust air or supply air); the non-return function works in the opposite direction. With the flow control valve GRLO, the flow control function is active in both directions.

The flow control function creates an adjustable annular gap inside the valve. This gap can be increased or decreased by turning the knurled screw or slotted head screw. The required restriction can be set with the help of this adjustment component.

- Note

The documentation for the flow control valves can be found at
➔ www.festo.com/catalogue

General information

Standard nominal flow rate qnN

The standard nominal flow rate qnN is the flow rate based on standard conditions at an operating pressure of p1 = 6 bar and an output pressure of p2 = 5 bar, measured at room temperature t = 20 °C.

Standard flow rate qn

The standard flow rate is measured at an operating pressure of p1 = 6 bar and an output pressure with respect to atmospheric pressure (p2 = 0 bar).

Exhaust air one-way flow control function

One-way flow control valves

FESTO

Key features

Flow control functions and range of applications				
Application	Description		Application	Description
Double-acting cylinder with one-way flow control valve				
Exhaust air one-way flow control function			Supply air one-way flow control function	
	Speed adjustment through exhaust air flow control. Uncontrolled supply air and controlled exhaust air move the piston between air cushions (improves motion, even with load changes).			Adjustable speed during advance and return strokes. The flow rate is identical in both directions.
Single-acting cylinder with one-way flow control valve			**Single-acting cylinder with flow control valve**	
Exhaust air and supply air one-way flow control function			Flow control function in both directions	
	Adjustable speed during advance and return strokes. The flow rate can be adjusted differently for both directions.			Speed adjustment through flow control on both sides is often applied in the case of single-acting or small cylinders. The benefit of this application lies in its simplicity.

Application examples	
Mini slide SLT with one-way flow control valve, standard	Flat cylinder DZF with one-way flow control valve, mini

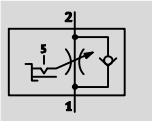
One-way flow control valves GRLSA, standard

FESTO

Technical data – Push-in connector QS, metal

One-way flow control function
Exhaust air



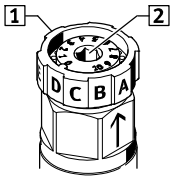
Flow rate
0 ... 450 l/min

Temperature range
–10 ... +60 °C

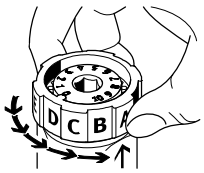
Operating pressure
0.2 ... 10 bar

This one-way flow control valve offers the ideal conditions for optimum and easy setting of the flow rate in a unique design.

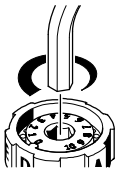
There are two setting options:



1 Gradual for preselection of the flow range in 5 stages via rotary switch: A, B, C, D, E



2 Infinitely variable for precision adjustment using internal hex via a scale marked from 0 to 10



General technical data			
Valve function		Exhaust air one-way flow control function	
Pneumatic connection 2		G1⁄8	G1⁄4
Pneumatic connection 1		QS-6	QS-8
Adjustment component		Rotary knob with scale and internal hex	
Actuation type		Manual	
Type of mounting		Screw-in	
Mounting position		Any	
Nominal tightening torque	[Nm]	3.5 ±20%	11 ±10%

Operating and environmental conditions		
Operating pressure complete temperature range	[bar]	0.2 ... 10
Operating medium		Compressed air in accordance with ISO 8573-1:2010 [7:4:4]
Note on operating/pilot medium		Operation with lubricated medium possible (in which case lubricated operation will always be required)
Ambient temperature	[°C]	–10 ... +60
Temperature of medium	[°C]	–10 ... +60
Storage temperature	[°C]	–10 ... +40

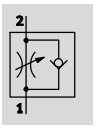
One-way flow control valves GRLA/GRLZ, mini

FESTO

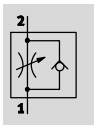
Technical data – Push-in connector QS, metal

One-way flow control function

Exhaust air



Supply air



- Low flow: precision adjustment for low speed

Flow rate
40 ... 48 l/min

Temperature range
–10 ... +60 °C

Operating pressure
0.2 ... 10 bar

General technical data – GRLA/GRGA			
Valve function		Exhaust air one-way flow control function	
Pneumatic connection 2		M3	M5
Pneumatic connection 1		QS-3	QS-3, QS-4
Adjustment component		Slotted head screw	
Type of mounting		Screw-in	
Mounting position		Any	
Max. tightening torque	[Nm]	0.3	1.5

General technical data – GRLZ/GRGZ			
Valve function		Supply air one-way flow control function	
Pneumatic connection 2		M3	M5
Pneumatic connection 1		QS-3	QS-3, QS-4
Adjustment component		Slotted head screw	
Type of mounting		Screw-in	
Mounting position		Any	
Max. tightening torque	[Nm]	0.3	1.5

Operating and environmental conditions		
Operating pressure	[bar]	0.2 ... 10
Operating medium		Compressed air in accordance with ISO 8573-1:2010 [7:4:4]
Note on operating/pilot medium		Operation with lubricated medium possible (in which case lubricated operation will always be required)
Ambient temperature	[°C]	–10 ... +60
Temperature of medium	[°C]	–10 ... +60
Storage temperature	[°C]	–10 ... +40
Certification		GRLA: Germanischer Lloyd

One-way flow control valves GRLA/GRLZ, mini

FESTO

Technical data – Push-in connector QS, metal
