Valve terminals series A5

Features and certifications

Valve terminals available in sizes 10mm and 14mm. Three different modular interfaces can be applied to all sub-bases for configuring the type of communication: Fieldbus interface (communication selectable between Profinet®, EtherCAT®, EtherNet/IP® and CC-Link IE™ Field Basic), multipolar Sub-D interface and IO-Link® interface. The solenoid valves are assembled in a simple and practical way. Each valve, even if in an intermediate position, can be easily replaced. The valve coils are low consumption (1.2W), with 360° view LED, equipped with "push" and bistable manual override. The multiple sub-bases with set positions, from 4 to 24, and with the possibility of internal or external piloting to the solenoid valves by simply applying a screw or plug in the relevant connection. Blanking plugs for unused positions and diaphragms for separate feeding or exhausts are available. Valve terminals are supplied complete (fittings, exhaust silencers and interface connection cables to be ordered separately), already assembled and tested. Supplied as standard in compliance to Reach and RoHS directives. The individual components necessary to compose a complete island can also be supplied separately.

Solenoid valves for valve terminals series A5

da pag. 2.71.1

Solenoid valves type A5V with sub-base connections for valve terminals series A5, available in size 10 mm and 14 mm, in different functions.

Low consumption coils (1.2W), with 360° view LED, equipped with "push" and bistable manual override. These valves, compatible with sub-bases of the respective size and with all the available communication interfaces, are assembled to the sub-base in a simple and practical way.

Sub-bases for valve terminals series A5

da pag. 2.72.1

Sub-bases type A5B for valve terminals series A5, available in sizes 10 mm and 14 mm, with set position from 4 to 24 (4, 5, 6, 7, 8, 9, 10, 12, 14, 16, 20 or 24 stations). Equipped with integrated PCB, are compatible with all the available interfaces (Fieldbus, Multipolar Sub-D and IO-Link®), and with solenoid valves of the respective size. Accessories such as plugs and screws for internal or external feeding, blanking plugs for unused positions, diaphragms for separated feeding and exhausts to be ordered separately.

Interfaces for valve terminals series A5

da pag. 2.73.1

Communication interfaces for valve terminals series A5. Available in three different types: Fieldbus interface, configurable in four protocols (Profinet®, EtherCAT®, EtherNet/IP® and CC-Link IE™ Field Basic); multipole Sub-D 25 poles interface; IO-Link® interface in version 8, 16 or 24 (depending on the maximum number of manageable valves).

Connection cables to be ordered separately.

Complete valve terminals series A5

da pag. 2.74.1

Complete valve terminals, available in sizes 10mm and 14mm, with sub-bases with set positions (from 4 to 24 stations) and with communication interface type Fieldbus (protocols configurables between Profinet®, EtherCAT®, EtherNet/IP® and CC-Link IE™ Field Basic), Sub-D or IO-Link®.

Valve terminals are supplied already assembled and tested.

Fittings, exhaust silencers, communication cables for interface and accessories for sub-bases are to be ordered separately.

Accessories for valve terminals series A5

da pag. 2.75.1

Accessories for sub-bases such as plugs and screws for internal or external feeding, blanking plugs for unused positions, diaphragms for separated feeding and exhausts.

Cables compatibles with modular communication interfaces type Fieldbus, Sub-D 25 poles and IO-Link®, available in different types and configurations.

Valve terminals series A5

Selection, configuration and code key

Series	Size	Communication	Positions	Piloting ⁽¹⁾	Valve type	Valve sequence ⁽²⁾	/	Plugs ⁽²⁾	/	Diaphragms ⁽²⁾
A5	14	07	09	E	B	1C2D4S	/	2T0409	/	AR0405
A5 10 = 10 mm 14 = 14 mm	14 10 = 10 mm 14 = 14 mm	07 01 = Fieldbus ProfiNET® 02 = Fieldbus EtherCAT® 03 = Fieldbus EtherNET/IP® 04 = Fieldbus CC-Link IE™Field Basic 05 = Sub-D 25 poles 06 = IO-Link® (up to 8 managed valves) 07 = IO-Link® (up to 16 managed valves) 08 = IO-Link® (up to 24 managed valves)	09 04 = 4 positions 05 = 5 positions 06 = 6 positions 07 = 7 positions 08 = 8 positions 09 = 9 positions 10 = 10 positions 12 = 12 positions 14 = 14 positions 16 = 16 positions 20 = 20 positions 24 = 24 positions	E E = External I = Internal	B B = Sub-bases valve L ⁽³⁾ = Semi in-line valve	1C2D4S		2T0409 T = Plug		AR0405 A = Feeding diaphragm R = Exhaust diaphragm

Important note

The desired valves has to be inserted in the code key as per the sequence indicated in the table:
 first 5/3, then 5/2 sol./sol., then 2-3/2, finally 5/2 sol./spring.

How to order⁽⁴⁾

Series	Size	Communication	Positions	Piloting	Valve type	Valve sequence	Plugs	Diaphragms

Notes

- For standard materials see from page 2.70.7
- For selection and configuration of the valve island, see from page 2.70.4
- (1) For further information on internal or external piloting, see page 2.70.6
- (2) For further information on valves sequence and position, on plugs and diaphragms sequence and position, see from page 2.70.4
- (3) For semi in-line valves, please contact the sales department.
- (4) Order example for 9 position sub-base, size 14mm, external piloting, IO-Link® 16 communication interface and the following solenoid valves assembled starting from the feeding/communication module: one element with 5/3 closed centres function, two elements with 5/2 solenoid/solenoid function, one plug for unused position, diafragma for separated feeding and diaaphragms for separated exhausts, four elements with 5/2 solenoid/spring function and one plug for unused position.

Valve terminals series A5

Selection, configuration and code key

Selection

Parameters for selection of the valve terminal:

- **size**: for flow rates up to 300 l/min size 10 mm, for flow rates up to 600 l/min size 14 mm;
- **the communication module**, available in Fieldbus interfaces (with Profinet®, EtherCAT®, EtherNET/IP® or CC-Link IE™Field Basic protocols), multipole Sub-D and IO-Link® (in version 8, 16 and 24 depending on the maximum number of manageable valves);
- **the number of positions on the sub-base**, from 4 to 24 positions, available: 4, 5, 6, 7, 8, 9, 10, 12, 14, 16, 20 or 24 stations;
- **the internal or external piloting** of the valve terminal, which in any case is always switchable (see page 2.70.6);
- **the number and functions of solenoid valves** needed in the application, the blanking plugs for any unused position and diaphragms for separated feedings and/or exhausts.

For the configuration and sequence of the different elements, please refer to the relevant tables on this page.

Elements configuration

The solenoid valves are indicated with a letter, while the quantity with a number. The sequence in which they will be assembled on the sub-base is intended starting from the communication interface module.

The priority in the suffix and the positioning on the sub-base is given by the order inside the grid, from top to bottom, preceded by the indication of the number of valves required.

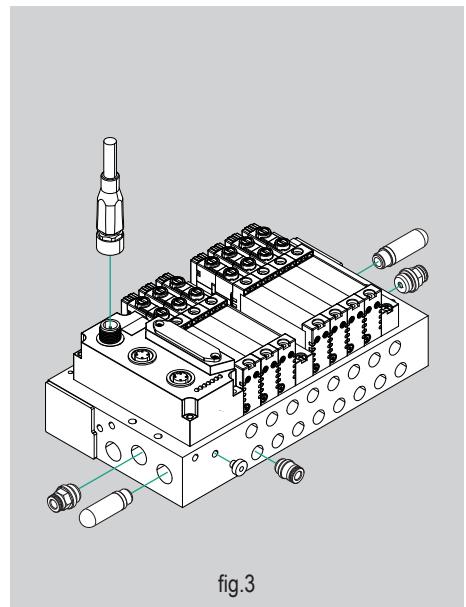

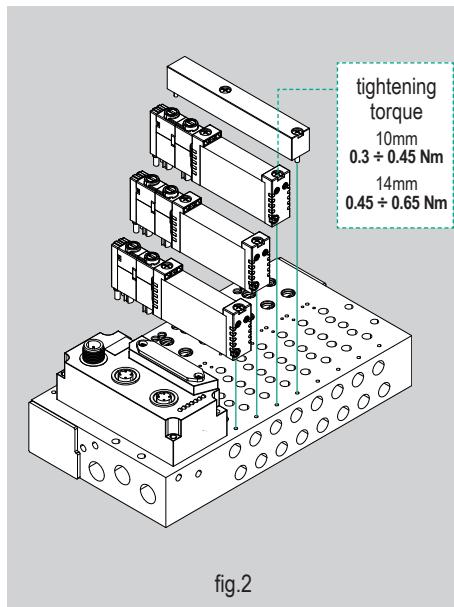

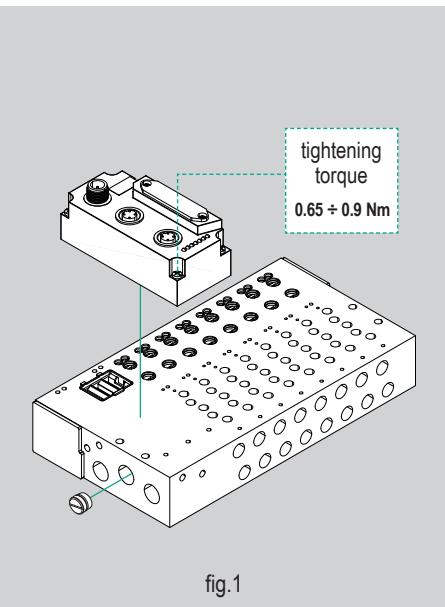

If is necessary to apply blanking plugs for unused positions, please indicate after the slash bar the number of elements required, the suffix "T", and the desired position on the base.

If is necessary to apply diaphragms to separate feedings and/or exhausts, please indicate after the slash bar the number of elements required, the suffix "A" for the separated feeding diaphragms and/or the suffix "R" for the separated exhausts diaphragms, and the desired position on the base.

For further information on the separated feeding and exhausts, please see page 2.70.6

The island configured in this way will be supplied complete (fittings, exhaust silencers and interface connection cables to be ordered separately), assembled and tested.

Elements assembly

If is required to assemble the valve terminal, install as the first element the communication module and any diaphragms for separate feedings or exhausts (see fig.1). For configuration and assembly of diaphragms, please see page 2.70.6

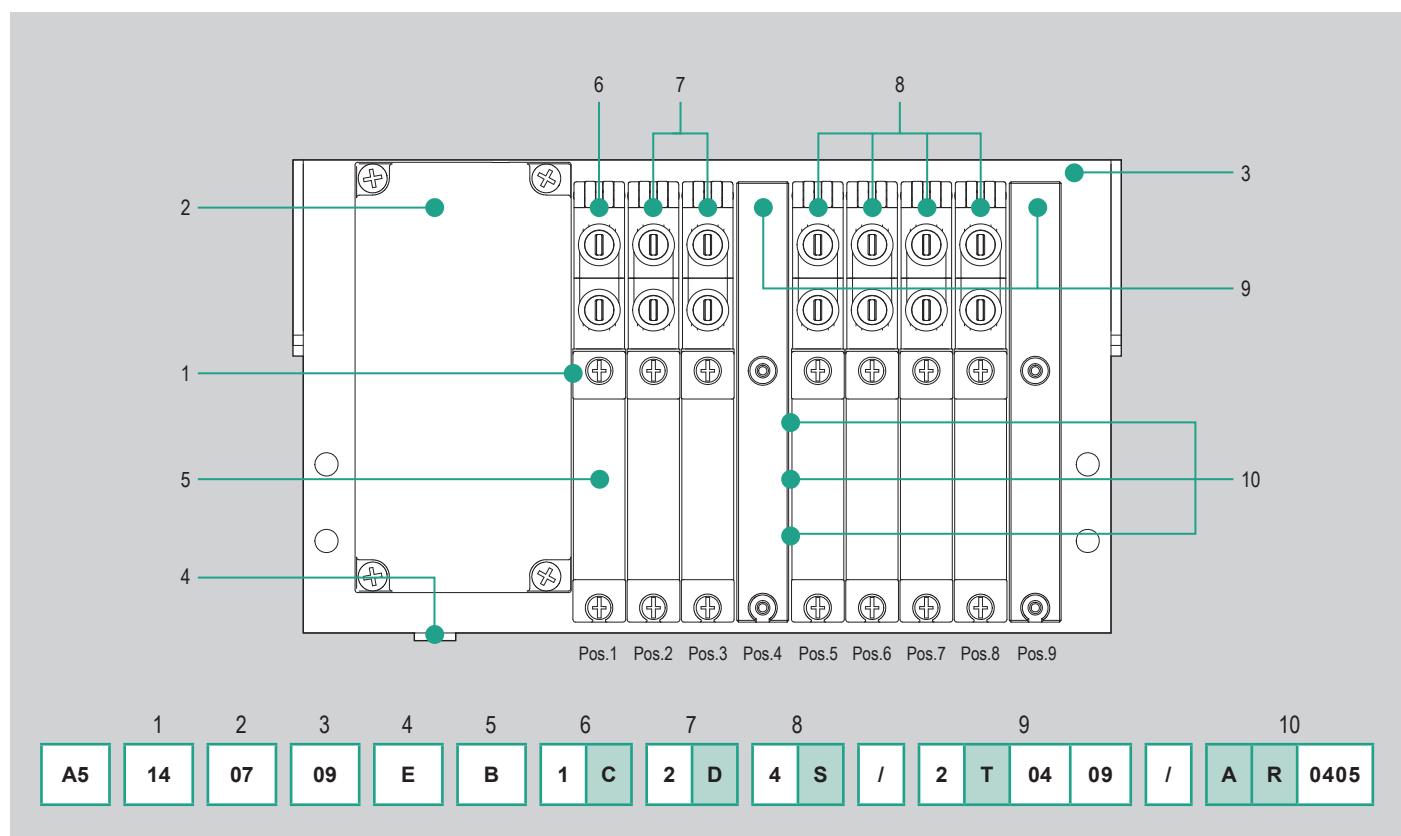

Then proceed installing the individual valves and any plugs for unused positions where applicable, always starting from the interface (see fig.2) following the order indicated in the table at page 2.70.5

Finally apply fittings, silencers and cables (see fig.3). For piloting configuration, please see page 2.70.6
Fittings, silencers, cables and accessories, to be ordered separately, see page 2.70.8

Valve terminals series A5

Selection, configuration and code key

Elements sequence example

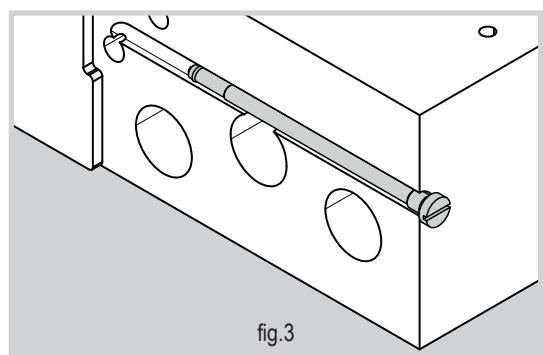

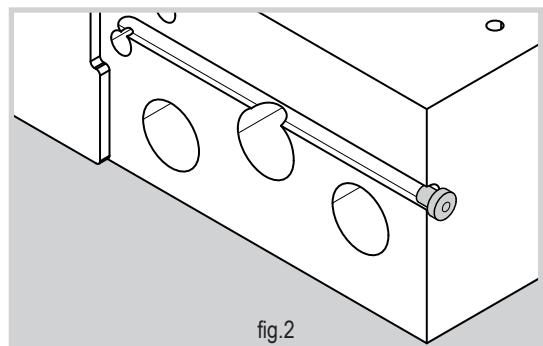

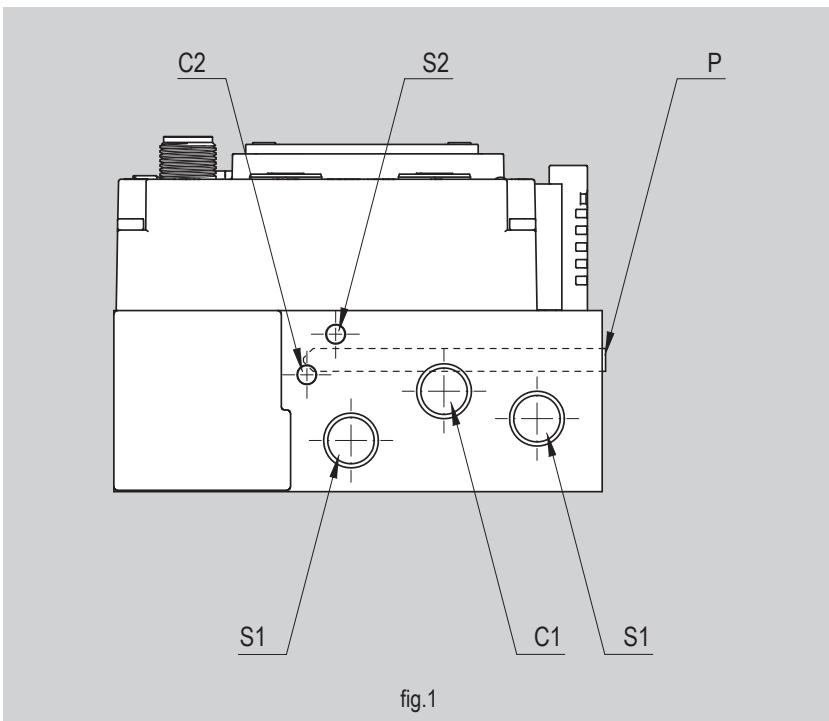

N.	Sequence type	Sequence	Description
1	Valve terminal features	14 Terminal size	Size 14 mm
2		07 Module type	Feeding/communication module IO-Link® up to 16 managed valves
3		09 Position number	9 positions on sub-base
4		E Piloting type	External piloting
5		B Valve type	Sub-base valve
6	Sequence at set positions (valves)	Elements number 1 C Valve function	(Table1) C = 5/3 closed centres E = 5/3 open centres P = 5/3 pressurized centres
7		Elements number 2 D Valve function	D = 5/2 solenoid/solenoid F = 2-3/2 N.C. G = 2-3/2 N.O.
8		Elements number 4 S Valve function	H = 2-3/2 N.C.-N.O. S = 5/2 solenoid/spring
9	Positionable sequence (plugs)	Elements type 2 T 04 09 Elements position 1st element position 2nd element position	T = Plug A = Feeding diaphragm R = Exhaust diaphragm 2 plugs in position 04 and 09
10	Positionable sequence (diaphragms)	Elements type A R 0405 Elements position	Diaphragms for separated feeding and exhaust positioned between 04 and 05

Valve terminals series A5

Selection, configuration and code key

Piloting configuration

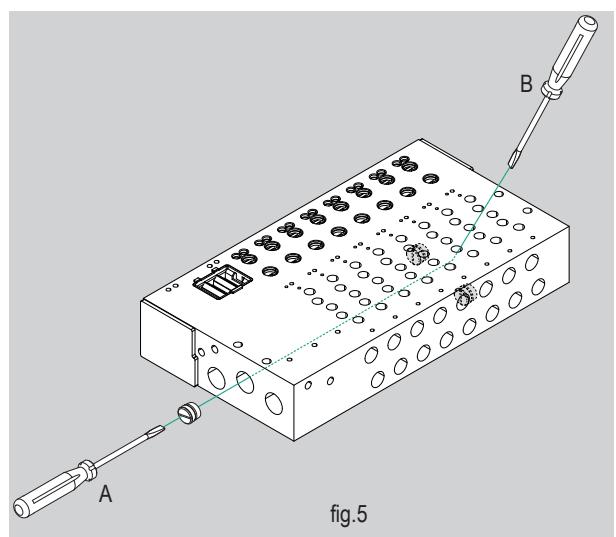

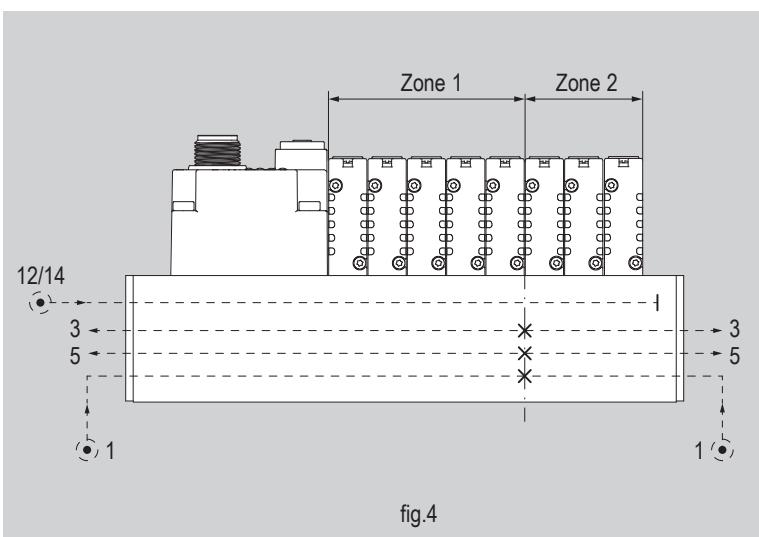

The A5 series valve terminals can be supplied with internal or external piloting. However, it's always possible to change the piloting from internal to external and vice versa by replacing the relevant component in the switching connection P (fig.1).

To switch internal piloting into external piloting, replace the plug type A0090505 (fig.2) with the screw type A5BAV (fig.3) to be ordered separately, see page 2.75.20. For feeding use the connection C2, for the exhaust use connection S2 (fig.1).

To switch external piloting into internal piloting, replace the screw type A5BAV (fig.3) with the plug type A0090505 (fig.2) to be ordered separately, see page 2.75.20. Feeding will be from the main connection C1 (fig.1).

The connections no longer used can be blanked with plugs, to be ordered separately, see page 2.75.21

Configuration of separated feedings and exhausts

If needed is possible to separate the feedings and/or the exhausts (see fig.4).

For this configuration, use the blanking diaphragms type A5BMC, to be ordered separately, see page 2.75.20

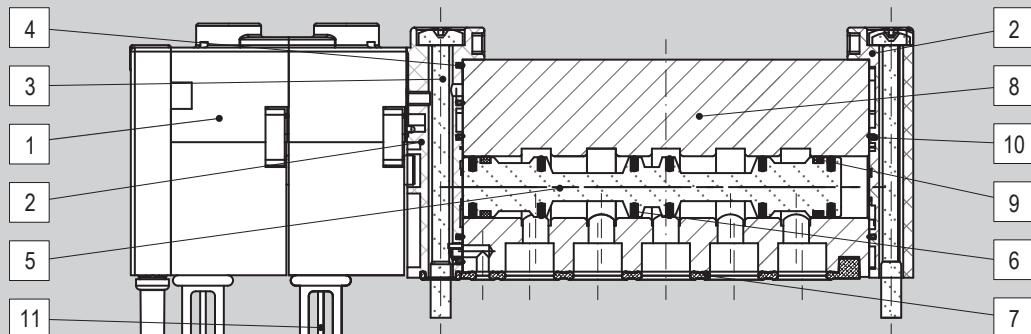

Mounting: the diaphragm will have to be mounted in the sub-base through the feeding or exhaust connection, inserting it with the slotted screwdriver "A" until reaching the desired position, identified thanks to the screwdriver "B", then locking it by rotating the screwdriver "A", as shown in the example in fig.5.

SOLENOID VALVES

for valve terminals series A5

2 - VALVES

2.71.1

Solenoid valves for valve terminals series A5

Features and certifications

Sub-base solenoid valves for valve terminals series A5, available in sizes 10 mm and 14 mm, in different functions (5/2, 5/3 and 2-3/2). Compatible with respective size sub-bases (see from page 2.72.1). Solenoid valves are assembled in a simple and practical way. Each valve, even if in an intermediate position, can be easily replaced. Equipped with low consumption coils (1.2W), with 360° view LED and with "push" and bistable manual override. Supplied as standard in compliance to Reach and RoHS directives.

Solenoid valves type A5V10.. 5/2

from page 2.71.10

Solenoid valves size 10 mm with sub-base connections for valve terminals series A5, available in functions 5/2 solenoid/spring and 5/2 solenoid/solenoid. Easy and practical mounting, low consumption coils (1,2W), 360° view LED and equipped with "push" and bistable manual override. Compatible with sub-bases size 10 mm and with all the communication interfaces.

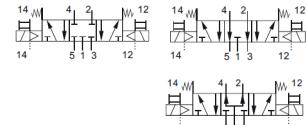

Solenoid valves type A5V10.. 5/3

from page 2.71.10

Solenoid valves size 10 mm with sub-base connections for valve terminals series A5, available in functions 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres. Easy and practical mounting, low consumption coils (1,2W), 360° view LED and equipped with "push" and bistable manual override. Compatible with sub-bases size 10 mm and with all the communication interfaces.

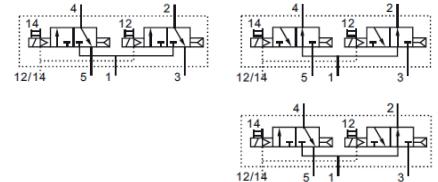

Solenoid valves type A5V10.. 2-3/2

from page 2.71.10

Solenoid valves size 10 mm with sub-base connections for valve terminals series A5, available in functions 2-3/2 normally closed-normally closed, 2-3/2 normally open-normally open and 2-3/2 normally closed-normally open. Easy and practical mounting, low consumption coils (1,2W), 360° view LED and equipped with "push" and bistable manual override. Compatible with sub-bases size 10 mm and with all the communication interfaces.

Solenoid valves type A5V14.. 5/2

from page 2.71.20

Solenoid valves size 14 mm with sub-base connections for valve terminals series A5, available in functions 5/2 solenoid/spring and 5/2 solenoid/solenoid. Easy and practical mounting, low consumption coils (1,2W), 360° view LED and equipped with "push" and bistable manual override. Compatible with sub-bases size 14 mm and with all the communication interfaces.

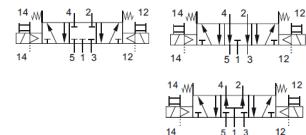

Solenoid valves type A5V14.. 5/3

da pag. 2.71.20

Solenoid valves size 14 mm with sub-base connections for valve terminals series A5, available in functions 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres. Easy and practical mounting, low consumption coils (1,2W), 360° view LED and equipped with "push" and bistable manual override. Compatible with sub-bases size 14 mm and with all the communication interfaces.

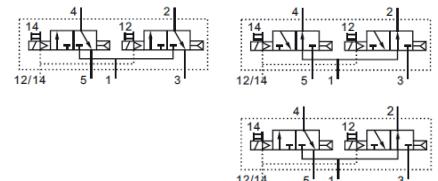

Solenoid valves type A5V14.. 2-3/2

from page 2.71.20

Solenoid valves size 14 mm with sub-base connections for valve terminals series A5, available in functions 2-3/2 normally closed-normally closed, 2-3/2 normally open-normally open and 2-3/2 normally closed-normally open. Easy and practical mounting, low consumption coils (1,2W), 360° view LED and equipped with "push" and bistable manual override. Compatible with sub-bases size 14 mm and with all the communication interfaces.

SUB-BASES

for valve terminals series A5

2 - VALVES

2.72.1

Sub-bases for valve terminals series A5

Features and certifications

Multiple sub-bases with integrated PCB for valve terminals series A5, available in sizes 10 mm and 14 mm, from 4 to 24 positions. Both sizes are compatible with all the communication interfaces (see from page 2.73.1). About solenoid valves, the 10 mm and 14 mm size sub-bases are compatible with the respective valve sizes (see from page 2.71.1).

Supplied as standard in compliance to Reach and RoHS directives.

Accessories such as screws for external piloting, plugs for unused positions, blanking diaphragm for separating feedings or exhausts to be ordered separately (see from page 2.75.1).

Sub-bases type A5B10..

from page 2.72.10

Sub-bases for valve terminals series A5 size 10 mm, available with set positions from 4 to 24 (4, 5, 6, 7, 8, 9, 10, 12, 14, 16, 20 or 24 stations).

Sub-bases series A5B are equipped with integrated PCB, are compatible with all available interface modules (Fieldbus, Multipolar Sub-D and IO-Link®) and with solenoid valves size 10 mm.

Accessories as screws for external piloting, plugs for unused positions, blanking diaphragm for separating feedings or exhausts to be ordered separately.

Sub-bases type A5B14..

from page 2.72.20

Sub-bases for valve terminals series A5 size 14 mm, available with set positions from 4 to 24 (4, 5, 6, 7, 8, 9, 10, 12, 14, 16, 20 or 24 stations).

Sub-bases series A5B are equipped with integrated PCB, are compatible with all available interface modules (Fieldbus, Multipolar Sub-D and IO-Link®) and with solenoid valves size 14 mm.

Accessories as screws for external piloting, plugs for unused positions, blanking diaphragm for separating feedings or exhausts to be ordered separately.

Sub-base 10 mm, 9 positions, internal piloting	036141 	A5B10I09
Sub-base 10 mm, 10 positions, internal piloting	036142 	A5B10I10
Sub-base 10 mm, 12 positions, internal piloting	036143 	A5B10I12
Sub-base 10 mm, 14 positions, internal piloting	036200 	A5B10I14
Sub-base 10 mm, 16 positions, internal piloting	036144 	A5B10I16
Sub-base 10 mm, 20 positions, internal piloting	036145 	A5B10I20
Sub-base 10 mm, 24 positions, internal piloting	036146 	A5B10I24
Sub-base 10 mm, 4 positions, external piloting	036147 	A5B10E04
Sub-base 10 mm, 5 positions, external piloting	036148 	A5B10E05
Sub-base 10 mm, 6 positions, external piloting	036149 	A5B10E06
Sub-base 10 mm, 7 positions, external piloting	036150 	A5B10E07
Sub-base 10 mm, 8 positions, external piloting	036151 	A5B10E08
Sub-base 10 mm, 9 positions, external piloting	036152 	A5B10E09
Sub-base 10 mm, 10 positions, external piloting	036153 	A5B10E10
Sub-base 10 mm, 12 positions, external piloting	036154 	A5B10E12
Sub-base 10 mm, 14 positions, external piloting	036201 	A5B10E14
Sub-base 10 mm, 16 positions, external piloting	036155 	A5B10E16
Sub-base 10 mm, 20 positions, external piloting	036156 	A5B10E20
Sub-base 10 mm, 24 positions, external piloting	036157 	A5B10E24

Technical data

Item	A5B10..04	A5B10..05	A5B1006	A5B10..07	A5B10..08	A5B10..09	A5B10..10	A5B10..12	A5B10..14	A5B10..16	A5B10..20	A5B10..24
Size	10 mm											
Positions	4	5	6	7	8	9	10	12	14	16	20	24
Fluid	Compressed air with or without lubrication. Lubrication, if started, must be continued.											
Pressure range	Depending on the configuration, see from page 2.70.3											
Temperature range	-5°C ÷ +60°C											
Flow at 6 bar with ΔP 1bar	300 l/min											
Piloting	Internal or external (see page 2.70.6; for item and code please see the table above)											
Sub-base air supply	G 1/4"											
Sub-base exhausts	G 1/4"											
Connection for external piloting ⁽¹⁾	M5											
Sub-base outlets	M7											
Solenoid valves matching ⁽²⁾	A5V10											
Internal data transmission	With integrated PCB											
Materials	Anodized aluminium											

Notes

For valve terminals configurations, please see from page 2.70.3;

For interfaces see from page 2.73.1

For accessories (piloting plugs and screws, plugs for unused positions, diaphragm for separated feeding or exhausts) to be ordered separately, see from page 2.75.20

For fittings, to be ordered separately, see from page 4.3.1; For exhaust silencers, to be ordered separately, see from page 4.150.1

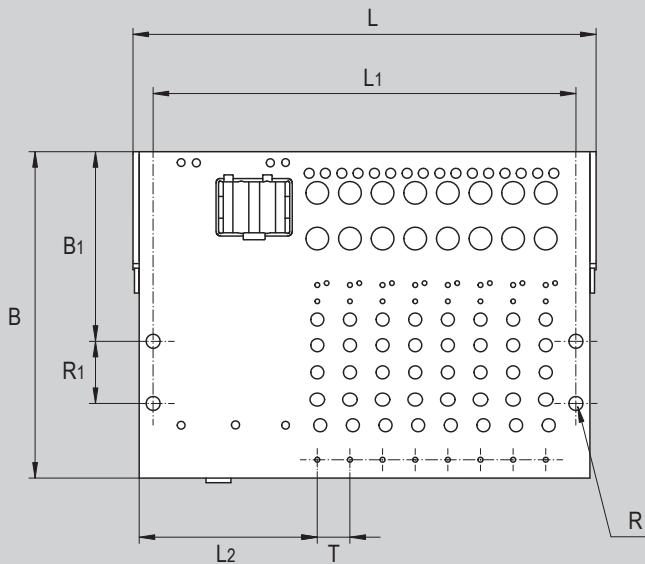

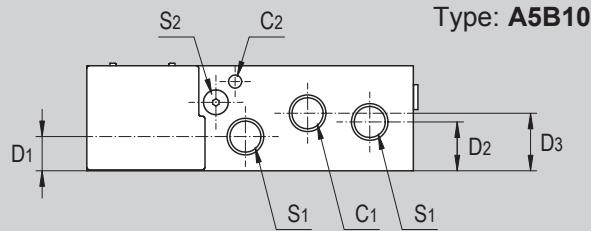

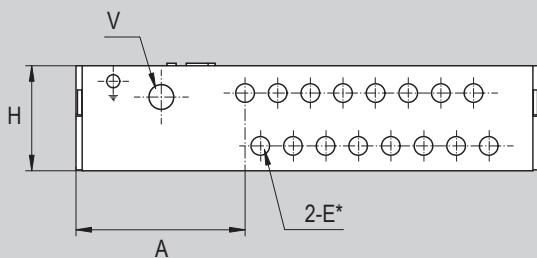

(1) In case of configuration with external piloting only.

(2) For 10 mm solenoid valves features see from page 2.71.20

Notes

Fittings, silencers and accessories to be ordered separately.

*There are 2 connections for each position on the sub-base, therefore the overall number of connections depends on the chosen configuration.

Sub-bases for valve terminals series A5

Type A5B14, size 14 mm

Main features

Version	Code	Item
Sub-base 14 mm, 4 positions, internal piloting	036158 	A5B14I04
Sub-base 14 mm, 5 positions, internal piloting	036159 	A5B14I05
Sub-base 14 mm, 6 positions, internal piloting	036160 	A5B14I06
Sub-base 14 mm, 7 positions, internal piloting	036161 	A5B14I07
Sub-base 14 mm, 8 positions, internal piloting	036162 	A5B14I08
Sub-base 14 mm, 9 positions, internal piloting	036163 	A5B14I09
Sub-base 14 mm, 10 positions, internal piloting	036164 	A5B14I10
Sub-base 14 mm, 12 positions, internal piloting	036165 	A5B14I12
Sub-base 14 mm, 14 positions, internal piloting	036202 	A5B14I14
Sub-base 14 mm, 16 positions, internal piloting	036166 	A5B14I16
Sub-base 14 mm, 20 positions, internal piloting	036167 	A5B14I20
Sub-base 14 mm, 24 positions, internal piloting	036168 	A5B14I24
Sub-base 14 mm, 4 positions, external piloting	036169 	A5B14E04
Sub-base 14 mm, 5 positions, external piloting	036170 	A5B14E05
Sub-base 14 mm, 6 positions, external piloting	036171 	A5B14E06
Sub-base 14 mm, 7 positions, external piloting	036172 	A5B14E07
Sub-base 14 mm, 8 positions, external piloting	036173 	A5B14E08
Sub-base 14 mm, 9 positions, external piloting	036174 	A5B14E09
Sub-base 14 mm, 10 positions, external piloting	036175 	A5B14E10
Sub-base 14 mm, 12 positions, external piloting	036176 	A5B14E12
Sub-base 14 mm, 14 positions, external piloting	036203 	A5B14E14
Sub-base 14 mm, 16 positions, external piloting	036177 	A5B14E16
Sub-base 14 mm, 20 positions, external piloting	036178 	A5B14E20
Sub-base 14 mm, 24 positions, external piloting	036179 	A5B14E24

Notes

Fittings, silencers and accessories to be ordered separately.

*There are 2 connections for each position on the sub-base, therefore the overall number of connections depends on the chosen configuration.

INTERFACES

for valve terminals series A5

2 - VALVES

2.73.1

Interfaces for valve terminals series A5

Features and certifications

Communication modular interfaces for valve terminals series A5.

Three interface types available:

- Fieldbus interface, with possibility of choosing between communication protocols: ProfiNET®, EtherCAT®, EtherNET/IP® or CC-Link IE™Field Basic;
- Multipole Sub-D connection interface;
- IO-Link® interface, available in version 8, 16 or 24, depending on the maximum number of manageable valves.

All interfaces can be installed on any type of sub-base: both size 10 mm and 14 mm (see from page 2.72.1)

Connection cables to be ordered separately (see from page 2.75.40)

Supplied as standard in compliance to Reach and RoHS directives.

Fieldbus interface series A5

from page 2.70.20

Fieldbus communication interface configurable in four protocols: ProfiNET®, EtherCAT®, EtherNET/IP® and CC-Link IE™Field Basic.

This interface can manage valve terminals from 4 to 24 positions, which allow to control up to 48 cylinders using 2-3/2 solenoid valves.

Connection cables to be ordered separately.

Sub-D interface series A5

from page 2.70.40

Sub-D 25 pin multipole communication interface.

This interface can manage valve terminals from 4 to 24 position, with a maximum of 12 double electric pilot solenoid valves or 24 single electric pilot solenoid valves.

Connection cables to be ordered separately.

IO-Link® interface series A5

from page 2.70.60

IO-Link® communication interface available in three versions, 8, 16 and 24, depending on the maximum number of manageable valves.

This interface, in version IO-Link® 8, can manage valve terminals from 4 to 8 position, which allows to control up to 16 cylinders using 2-3/2 solenoid valves; in version IO-Link® 16 this module can manage valve terminals from 4 to 16, which allows to control up to 32 cylinders using 2-3/2 solenoid valves; interface IO-Link® 24 can manage valve terminals from 4 to 24, which allows to control up to 48 cylinders using 2-3/2 solenoid valves.

Connection cables to be ordered separately.

Interfaces for valve terminals series A5

Fieldbus

Main features

Version	Code	Item	Symbol
Fieldbus interface with Profinet® protocol	036100	A501	
Fieldbus interface with EtherCAT® protocol	036101	A502	
Fieldbus interface with EtherNet/IP® protocol	036102	A503	
Fieldbus interface with CC-Link IE™ Field Basic protocol	036103	A504	

Technical data

Item	A501	A502	A503	A504
Communication protocol	Profinet®	EtherCAT®	EtherNet/IP®	CC-Link IE™ Field Basic
Maximum managed valves	24 solenoid valves (also with double electric pilot)			
Temperature range	-5°C ÷ +60°C			
Voltage	24 VDC			
Electrical consumption	1,2 W			
Power supply input	M12 Male 4 pin, A-coded (for configuration see table below)			
Communication input	M12 Female 4 pin, D-coded (for configuration see table below)			
Power supply cable*	M12 Female cable type CAVFBFD			
Communication cable*	M12 Male cable type CAVFBMD, CAVFBMM, CAVFBMR			
Control	On integrated dial (see table below)			
Control indicator	LED (see table below)			

*Cables to be ordered separately, see from page 2.75.40

Fieldbus module

N.	Description	Function
1	Control dial	Allows to set the IP address and valve coils
2	Control indicator	Indicates the status and operation of functions via LEDs
3	Communication (output)	Output communication port type M12 female 4-pin, D-coded
4	Communication (input)	Input communication port type M12 female 4-pin, D-coded
5	Power supply	Power supply input port type M12 male 4-pin, A-coded

Power supply configuration

	Pin	Function
	1	UA Actuator power supply
	2	GND Actuator power supply
	3	US Bus power supply
	4	GND Bus power supply

Communication configuration (input)

	Pin	Function
	1	Tx+ Data transfer (+)
	2	Rx+ Data receiving (+)
	3	Tx- Data transfer (-)
	4	Rx- Data receiving (-)

Communication configuration (output)

	Pin	Function
	1	Tx+ Data transfer (+)
	2	Rx+ Data receiving (+)
	3	Tx- Data transfer (-)
	4	Rx- Data receiving (-)

Interfaces for valve terminals series A5

Sub-D

Main features

Version	Code	Item	Symbol
Sub-D 25 poles interface	036104	A505	-

Technical data

Item	A505
Communication protocol	Sub-D 25 pin
Maximum managed valves	24 single electric pilot solenoid valve, 12 double electric pilot solenoid valve
Temperature range	-5°C ÷ +60°C
Voltage	24 VDC
Electrical consumption	1,2 W
Power supply cable*	Sub-D Female 25 pin cable type CAVSDFD
Communication cable*	Sub-D Female 25 pin cable type CAVSDFD

*Cables to be ordered separately, see page 2.75.42

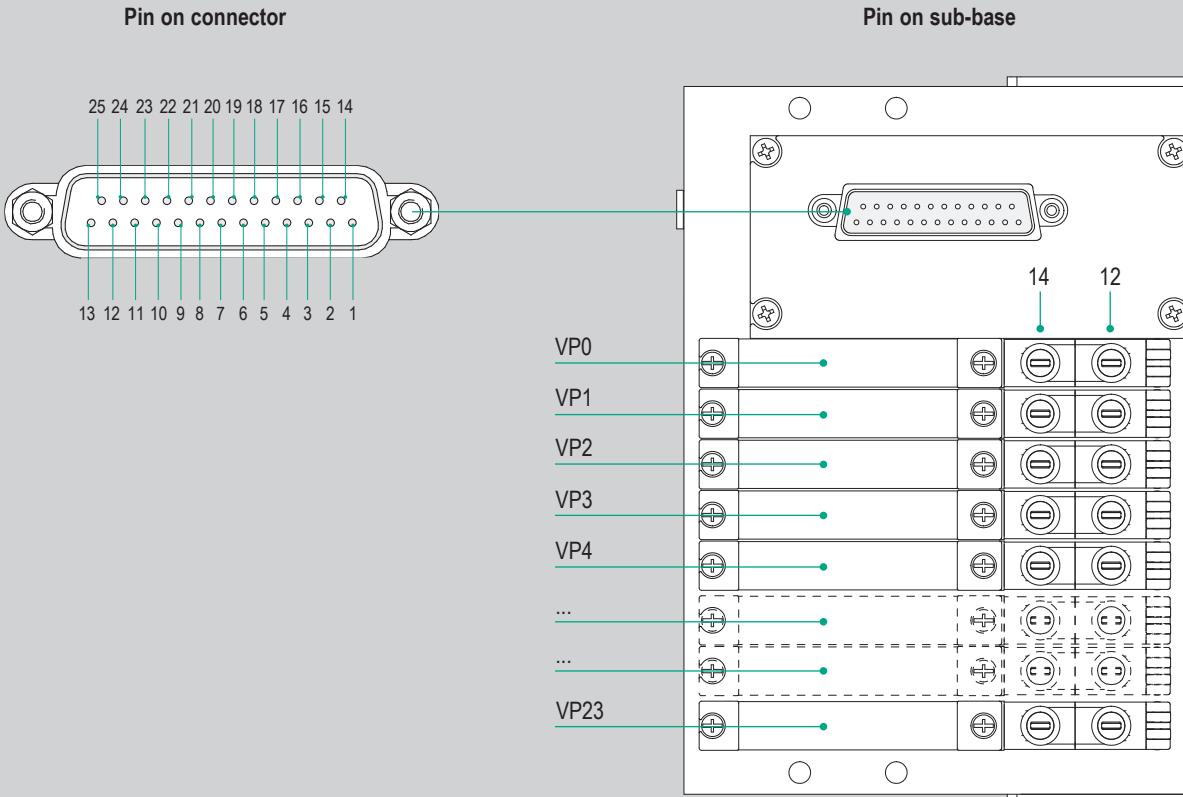

Sub-D module

N.	Description	Function
1	Connector	Sub-D Male 25 pin (see tabel at page 2.71.21)
2	Pin	Each pin controls a function of the valve terminal (see table at page 2.71.21)

Interfaces for valve terminals series A5

IO-Link® module

N.	Description	Function
1	Connector	M12 Male 5 pin (see table below)
2	Control indicator	Green LED (flashing) = normal operating state
		Red LED (stationary) = no power supply or IO-Link® signal
		Blue LED (stationary) = open or overloaded circuit

IO-Link® connector configuration

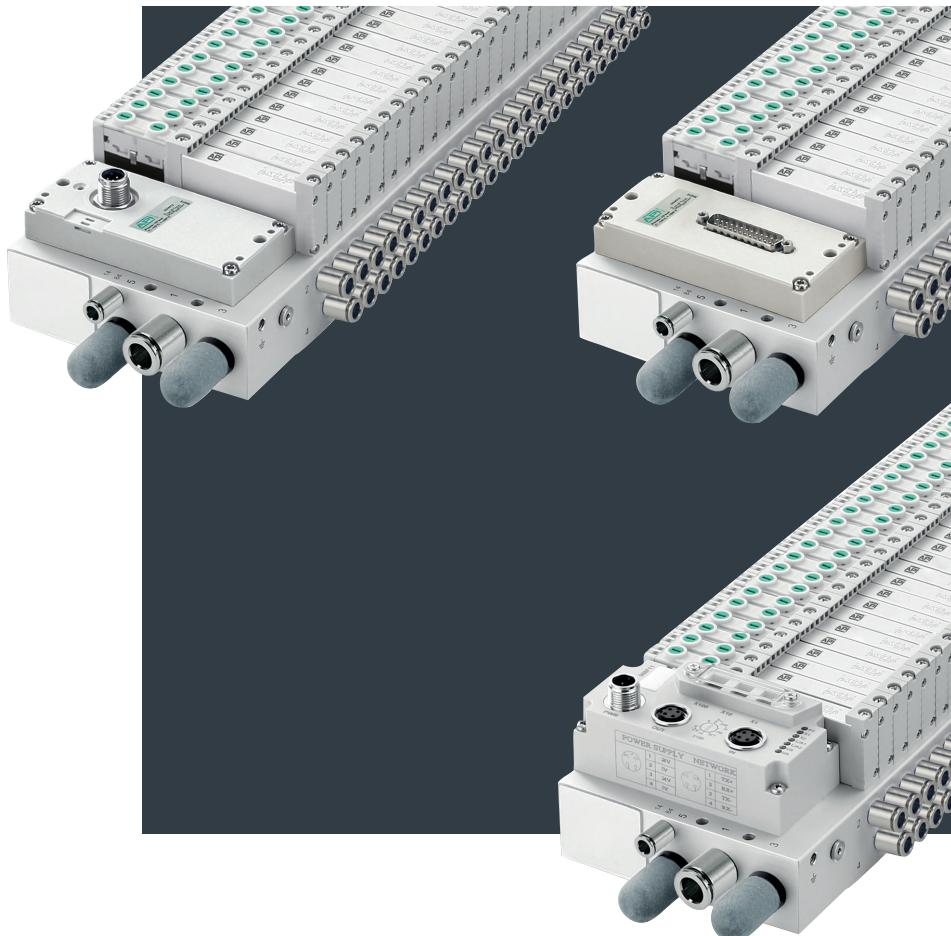

Pin	Features	Function
1	24V EL/SEN (PS)	Power supply
2	24V BAL/OUT (PL)	Power supply load
3	0V EL/SEN (PS)	Power supply
3	C/Q	Communication
5	0V VAL/OUT (PL)	Power supply load

IO-Link® drive file

Description	Specifics
Electrical features	V1.1
Data transmission rate	COM2 (38,4KBit)
Data output	2, 4, 6 bytes

VALVE TERMINALS

Series A5 complete and assembled

2 - VALVES

2.74.1

Valve terminals series A5 complete and assembled

Features and certifications

Complete valve terminals available in sizes 10mm and 14mm, composed by

- **sub-bases** with set positions, from 4 to 24 stations, with possibility of internal or external piloting of solenoid valves, simply applying a screw or a plug in the relevant connection;

- **interface** with possibility of three types: Fieldbus interface (communication selectable between Profinet®, EtherCAT®, EtherNET/IP® and CC-Link IE™ Field Basic), multipolar Sub-D communication interface and IO-Link® interface.

- **solenoid valves** with possibility of choice between many functions (5/2, 5/3 e 2-3/2), assembled in a simple and practical way. Each valve, even if in an intermediate position, can be easily replaced. The valve coils are low consumption (1.2W), with 360° view LED, equipped with "push" and bistable manual override.

Valve terminals are supplied already assembled and tested, and in compliance to Reach and RoHS directives as standard.

Fittings, exhaust silencers, interface connection cables, blanking plugs and diaphragms for separated feeding or exhausts are to be ordered separately.

Valve terminals series A5 with Fieldbus interface

from page 2.70.20

Complete valve terminals with Fieldbus communication interface (selectable between Profinet®, EtherCAT®, EtherNET/IP® and CC-Link IE™ Field Basic protocols).

Available in size 10mm and 14mm, with possibility to choose sub-bases from 4 to 24 positions: that allows to control up to 48 cylinders with 2-3/2 valves.

Valve terminals are supplied already assembled and tested.

Fittings, exhaust silencers, interface connection cables, blanking plugs and diaphragms for separated feeding or exhausts are to be ordered separately.

Valve terminals series A5 with Sub-D interface

from page 2.70.40

Complete valve terminals with multipole Sub-D 25 poles communication interface.

Available in size 10mm and 14mm, with possibility to choose sub-bases from 4 to 24 positions: this allows to allocate a maximum of 12 double pilot solenoid valves or 24 single pilot solenoid valves.

Valve terminals are supplied already assembled and tested.

Fittings, exhaust silencers, interface connection cables, blanking plugs and diaphragms for separated feeding or exhausts are to be ordered separately.

Valve terminals series A5 with IO-Link® interface

from page 2.70.60

Complete valve terminals with IO-Link® communication interface (in three different versions, 8, 16 and 24, depending on the maximum number of manageable valves).

Available in size 10mm and 14mm, with possibility to choose sub-bases from 4 to 24 positions: this allows to control up to 48 cylinders with 2-3/2 valves.

Valve terminals are supplied already assembled and tested.

Fittings, exhaust silencers, interface connection cables, blanking plugs and diaphragms for separated feeding or exhausts are to be ordered separately.

ACCESSORIES

for valve terminals series A5

2 - VALVES

2.75.1

Accessories for valve terminals series A5

Features and certifications

Accessories for valve terminals serie A5 to use with the sub-bases (plugs and screws for piloting switch, blanking plugs for unused positions, diaphragms for separated feeding and exhausts) and with the interfaces (communication cables), available for all sizes and types.
Accessories are supplied conforming to Reach and RoHS directives as standard.

Accessories for sub-bases

da pag. 2.75.20

Accessories for valve terminals series A5.

Accessories for sub-bases.

Plugs and screws for the piloting switch, blanking plugs for unused positions, diaphragms for separated feeding and exhausts.

Cables for interfaces

da pag. 2.75.40

Accessories for valve terminals series A5

Cables compatible with modular communication interfaces type Fieldbus, Sub-D 25 poles and IO-Link®, available in different types and configurations.

Accessories for valve terminals series A5

Accessories for sub-bases. Plugs and screws for piloting switch and diaphragms for separated feeding and exhausts

Main features

Code	Item	Description
022521	A0090505	Plug for the pilot switching connection

Technical data

Item	A0090505	
Code	022521	
Temperature	-5°C ÷ +60°C	
Thread size	M5	
Matching	A5B10	A5B14
Function	For internal piloting configuration (see page 2.70.6)	
Installation	See from page 2.70.4	
Mounting	Allen key	

Materials

Description	Material
Body	Nickel-plated brass
Seals	NBR

Main features

Code	Item	Description
036180	A5BAV	Screw for the pilot switching connection

Technical data

Item	A5BAV	
Code	036180	
Temperature	-5°C ÷ +60°C	
Thread size	M5	
Matching	A5B10	A5B14
Function	For external piloting configuration (see page 2.70.6)	
Installation	See from page 2.70.4	
Mounting	Flat-blade screwdriver	

Materials

Description	Material
Body	Brass
Seals	NBR

Main features

Code	Item	Description
036183	A5BMC	Diaphragm for separating feeding or exhausts

Technical data

Item	A5BMC	
Code	036183	
Temperature	-5°C ÷ +60°C	
Thread size	G 1/4"	
Matching	A5B10	A5B14
Function	For separated feeding or exhausts configuration	
Installation	See page 2.70.6	
Mounting	Flat-blade screwdriver	

Materials

Description	Material
Body	Brass
Seals	NBR

Accessories for valve terminals series A5

Accessories for sub-bases. Blanking plugs

Main features

Code	Item	Description
036181	A5BTC10	Blanking plug for unused positions on 10mm sub-bases
036182	A5BTC14	Blanking plug for unused positions on 14mm sub-bases

Technical data

Item	A5BTC10	A5BTC14
Code	036181	036182
Temperature	-5°C ÷ +60°C	
Size	10 mm	14 mm
Matching	A5B10	A5B14
Function	For blanking any unused position on the sub-base	
Installation	In the unused position on the sub-base	
Mounting screws	Ø 2,55	Ø 3

Materials

Description	Material
Body	Aluminium
Seals	NBR

Main features

Code	Item	Description
022528	A0090707	Blanking plug for connections on 10 mm sub-base
022522	A0091818	Blanking plug for connections on 14 mm sub-base
022521	A0090505	Blanking plug for feeding or exhaust connection
022523	A0091414	Blanking plug for feeding or exhaust connection

Technical data

Item	A0090707	A0091818	A0090505	A0091414
Code	022528	022522	022521	022523
Temperature	-10°C ÷ +60°C			
Thread size	M7	G 1/8"	M5	G 1/4"
Matching	A5B10	A5B14	A5B10 A5B14	A5B10 A5B14
Installation	Connection E (see page 2.72.11 and 2.72.22)	See page 2.70.4		
Mounting	Allen key			

Materials

Description	Material
Body	Nickel-plated brass
Seals	NBR

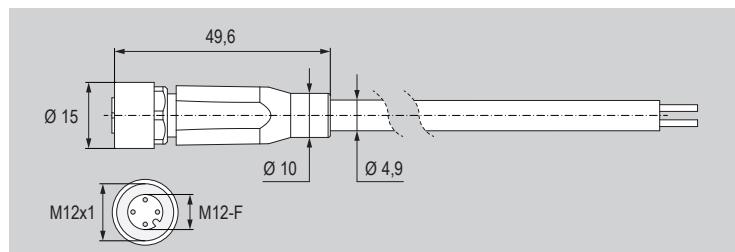

Accessories for valve terminals series A5

Cables for interfaces. Connection cables for Fieldbus interface

Main features

CAVFBFD

Type

Features

Code	Item	Description
036108	CAVFBFD02	Power cable for Fieldbus interface, with M12 Female connector on input, and direct output with flexible cable. Length 2 m.
036109	CAVFBFD04	Power cable for Fieldbus interface, with M12 Female connector on input, and direct output with flexible cable. Length 4 m.

Technical Data

Type	CAVFBFD02	CAVFBFD04
Cable	4 x 0,34 mm ²	
Cable length	2 mt.	4 mt.
Electrical connection	M12 Female connector	
Temperature range	-5°C ÷ +80°C	
Protection grade	IP 65	

Connector features

		Pin	Function
		1	UA Actuator power supply
		2	GND Actuator power supply
		3	US Bus power supply
		4	GND Bus power supply

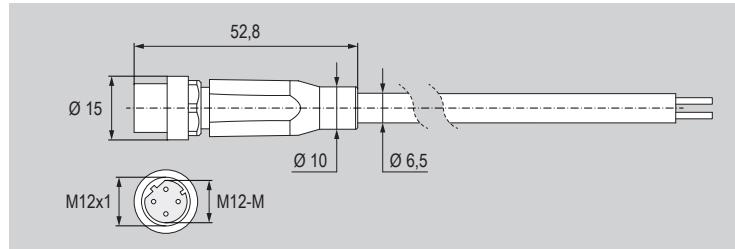

Materials

Description	Material
Cable sheathing	Grey PVC
Connector sheath	Black PVC
Connector housing	Brass
Connector contacts	Polypropylene

Main features

CAVFBMD

Type

Features

Code	Item	Description
036110	CAVFBMD02	Communication cable for Fieldbus interface, with M12 Male connector on input, and direct output with flexible cable. Length 2 m.
036111	CAVFBMD04	Communication cable for Fieldbus interface, with M12 Male connector on input, and direct output with flexible cable. Length 4 m.

Technical Data

Type	CAVFBMD02	CAVFBMD04
Cable	AWG22	
Cable length	2 mt.	4 mt.
Electrical connection	M12 Male connector	
Temperature range	-5°C ÷ +80°C	
Protection grade	IP 65	

Connector features

		Pin	Function
		1	TD+ Data transfer
		2	RD+ Data receiving
		3	TD- Data transmission
		4	RD- Data receiving

Materials

Description	Material
Cable sheathing	Green PVC
Connector sheath	Black PVC
Connector housing	Brass
Connector contacts	Brass

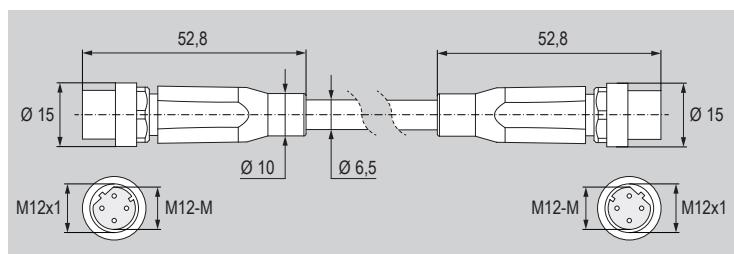

Accessories for valve terminals series A5

Cables for interfaces. Connection cables for Fieldbus interface

Main features

CAVFBMM

Type

Features

Code	Item	Description
036112	CAVFBMM02	Communication cable for Fieldbus interface, with M12 Male connector on input and output. Length 2 m.
036113	CAVFBMM04	Communication cable for Fieldbus interface, with M12 Male connector on input and output. Length 4 m.

Technical Data

Type	CAVFBMM02	CAVFBMM04
Cable	AWG22	
Cable length	2 mt.	4 mt.
Electrical connection	M12 Male connector	
Temperature range	-5°C ÷ +80°C	
Protection grade	IP 65	

Connector features

		Pin	Function	
		1	TD+	Data transfer
		2	RD+	Data receiving
		3	TD-	Data transmission
		4	RD-	Data receiving

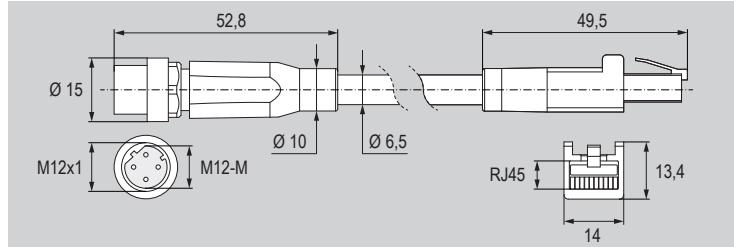

Materials

Description	Material
Cable sheathing	Green PVC
Connector sheath	Black PVC
Connector housing	Brass
Connector contacts	Brass

Main features

CAVFBMR

Type

Features

Code	Item	Description
036114	CAVFBMR02	Communication cable for Fieldbus interface, with M12 Male connector input, and RJ45 network connector output. Length 2 m.
036115	CAVFBMR04	Communication cable for Fieldbus interface, with M12 Male connector input, and RJ45 network connector output. Length 4 m.

Technical Data

Type	CAVFBMR02	CAVFBMR04
Cable	AWG22	
Cable length	2 mt.	4 mt.
Electrical connection	M12 Male connector	
Temperature range	-5°C ÷ +80°C	
Protection grade	IP 65	

Connector features

		Pin	Function	
		1	TD+	Data transfer
		2	RD+	Data receiving
		3	TD-	Data transmission
		4	RD-	Data receiving

Materials

Description	Material
Cable sheathing	Green PVC
Connector sheath	Black PVC
Connector housing	Brass
Connector contacts	Brass

Accessories for valve terminals series A5

Cables for interfaces. Connection cables for Sub-D interface

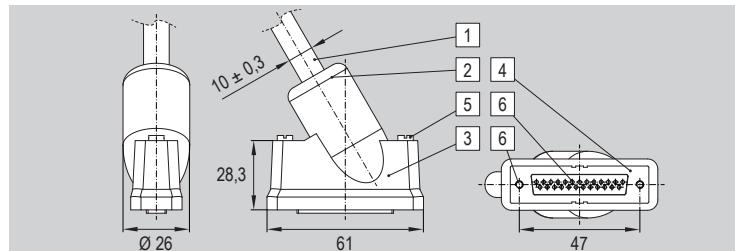

Main features

758-2464

CAVSDFD

Type

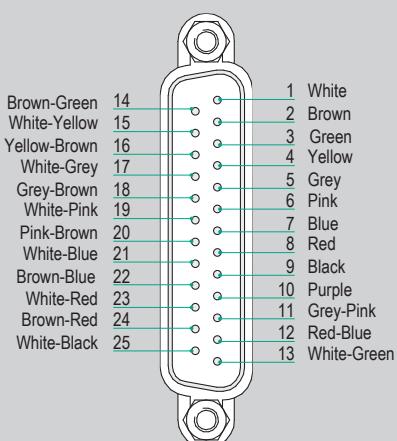

Features

Code	Item	Description
036116	CAVSDFD02	Communication cable for Sub-D multipole interface, with Sub-D 25-pole Female connector on input, and direct output with flexible cable. Length 2 m.
036117	CAVSDFD05	Communication cable for Sub-D multipole interface, with Sub-D 25-pole Female connector on input, and direct output with flexible cable. Length 5 m.
036204	CAVSDFD15	Communication cable for Sub-D multipole interface, with Sub-D 25-pole Female connector on input, and direct output with flexible cable. Length 15 m.

Materials

Position	Description	Material
1	Cable ferrule	Gray PVC (RAL7001)
2	Cable ferrule	Black polypropylene
3	Connector jacket	Black polypropylene
4	Connector housing	Steel
5	Connector screws	Steel
6	Connector contacts	Gold-plated brass
7	Connector nuts	Nickel-plated brass

Connector features

Technical Data

Type	CAVSDFD02	CAVSDFD05	CAVSDFD15
Cable	25 x 0,34 mm ² , flexible, fireproof		
Cable normative	UL758-2464		
Cable length	2 mt.	5 mt.	15 mt.
Electrical connection	M12 female connector		
Temperature range	-5°C ÷ +80°C		
Protection grade	IP 65		
Maximum clamping force of cable ferrule	3 Nm ± 20%		
Maximum tightening force of the connector screws	0,5 Nm ± 50%		

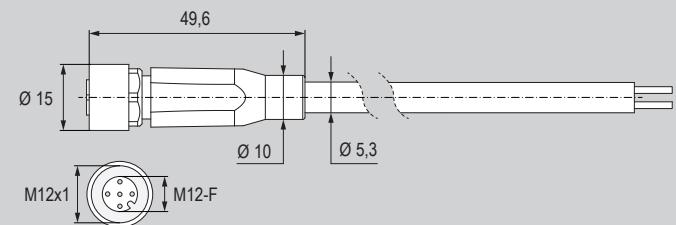

Accessories for valve terminals series A5

Cables for interfaces. Connection cables for IO-Link® interface

Main features

CAVILFD

Type

Features

Code	Item	Description
036118	CAVILFD02	Communication cable for IO-Link® interface, with M12 Female connector on input, and direct output with flexible cable. Length 2 m.
036119	CAVILFD04	Communication cable for IO-Link® interface, with M12 Female connector on input, and direct output with flexible cable. Length 4 m.

Technical Data

Type	CAVILFD02	CAVILFD04
Cable	5 x 0,34 mm ²	
Cable length	2 mt.	4 mt.
Electrical connection	M12 Female connector	
Temperature range	-20°C ÷ +80°C	
Protection grade	IP 65	

Connector features

	Pin	Function	
		Pin	Function
	1	UA	Actuator power supply
	2	GND	Actuator power supply
	3	US	Bus power supply
	4	GND	Bus power supply

Materials

Description	Material
Cable sheathing	Grey PVC
Connector sheath	Black PVC
Connector housing	Brass
Connector contacts	Polypropylene
